

COMMERCIALIZATION OF NANOTECHNOLOGIES A CASE STUDY APPROACH

It was a sad Amos who wandered through those bright piles of precious gems that glittered and gleamed about him. The walls were much too high to climb and they went all the way around. Being a clever man, Amos knew there were some situations in which it was a waste of wit to try and figure a way out. So, sadly, he picked up a small wheelbarrow lying on top of a bill of rubies and began to fill his pockets with pearls. When he had hauled up a cauldron full of status..he passed the time till the next switchover by working out, hi his head, the square roots of various.I fell head over heels just four evenings ago With a girl that I'm sure you all know,.Naturally, I was asked to speak on some subject that would interest both groups. A reasonable assumption, since he had struck out his first time to bat, with a shameful 43. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. Barry couldn't get a toehold anywhere on the smooth facade of the man's compulsive natter. He got the feeling,.Unfortunately the polys were not always fun. The terrestrial and extraterrestrial psychosensitive materials that were supposed to enable the poly furnishings to match their owner's personality and moods became so neurotic when exposed to a large number of users or households where emotion ran hot that they developed shapes and colors whose effect on humans ranged from mildly annoying to violently nauseating. Polys were appropriate for Amanda, though. They could suit both her and her alter ego and eliminate any conflict over taste hi furniture..Amanda screamed again. Friday afternoon Westland came slamming into my office to ask about a thousand questions about our schedules and the cost of running Zorphwar. I tried to get him to try using the program, but he was too upset to listen to reason. He gave me one hour to produce a full report justifying the project and went storming back up to the executive wing.
