"Ah, yes., a little the worse for wear, but he'll be as good as new." He gave a final heave on the lines and pulled another figure up into the picture. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose.. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean canvas, unspoiled and 'unsullied', awaiting, the fresh imprint of Kalens's design.. "Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?." "I agree," Marcia Quarrey said. She looked at Borftein. "If that's the case, then sending in the SD's would only confirm their fears. It would be the worst thing we could do." But after Kath's cryptic statement, he wasn't inclined to argue too much. "Hell, it's not so bad. He doesn't need anyone to stop him from getting shot," he replied. Beside him, Jay's face dropped. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings Of a wry grin appeared around his mouth. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one..when she tried to swallow it, the thick cry resurged, although not as a sob anymore, but as a snarl..thee with a work of art fair suitable for the galleries of Eden.".. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..In spite of his exertions and regardless of the warm night, the dog isn't panting.
