Detweiler's breathing grew slower and quieter, more relaxed. He lay with his eyes closed and an expression of almost sexual pleasure on his face. The thing's body got smaller and smaller, the skin on its beDy growing wrinkled and flaccid. A trickle of blood crawled from the wound, making an erratic line across the Detweiler boy's back. The thing reached out its hand and wiped the drop back with a. "Miss Tremaine, will you get Gus Verdugo on the phone, please?" .He nodded. "Ticky-tacky." .INTRODUCTION.As a historian, he felt he could not let such a moment slip by unobserved. Silly, but there it was. He had to be out there, watch it with his own eyes. It didn't matter if he never lived to tell about it, he must record it..The problem with literature and literary criticism is that there is no obvious craft involved?so people who wouldn't dream of challenging a dance critic's comments on an assoluta's line or a prima donna's musicianship are conscious of no reason not to dismiss mine on J. R. R. Tolkien. We're all dealing with language, after all, aren't we? But there is a very substantial craft involved here, although its material isn't toes or larynxes. And some opinions are worth a good deal more than others..coming to boil, then a rapid series of clangs. A tiny white ball came through the doorway and bounced off three walls. It moved almost faster than they could follow. It hit Crawford on the arm, then fell to the floor where it gradually skittered to a stop. The hissing died away, and Crawford picked it up. It was lighter than it had been. There was a pinhole drilled in one side. The pinhole was cold when he touched it with his fingers. Startled, thinking he was burned, he stuck his finger in his mouth, then sucked on it absently long after he knew the truth..Ents (or his other bucolic-comic creations) are as empty-sublime as the Big People's heroics. And yet?We're all just one happy show-biz.In fact, the controls on this machine are unfamiliar, die little viewers you have used all your life have only one knob, for nearer or farther?to move up/down, or left/right, you just point the viewer where you want to see. This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then yon are floating out the window with the same slow and steady motion, on across the sunlit pasture where two saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. Yon press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be..*Tm pregnant," she announced to them that night, causing Song to delay her examination of the white fruit.."Rob, are you ready?" He never told me anything that would connect him to nine deaths, mostly about where he'd been, things he'd read. He read a lot, just about anything he could get his hands on. I got the impression he hadn't really lived Me so much as he'd read it, that all the things he knew about had never physically affected him. He was like an insulated island. Life flowed around him but never touched him, I wondered if the hump on his back made that much difference, if it made him such a green monkey he'd had to retreat into his insular existence. Practically everyone I had talked to liked him, mixed with varying portions of pity, to be sure, but liking nevertheless. Harry Spinner liked him, but had discovered something "peculiar" about him. Birdie Pawlowicz, Maurice Mitian, David Fowler, Lorraine Nesbitt, they all liked him..Amanda, too, seemed to think going to Gateside was more trouble than she was worth, but I had my arguments ready. The place was even more bountiful than the last time Crawford had taken a look. There were thick vines mat Song assured him were running with.Dramatization is another. I (like many reviewers) often stage a tittle play called The Adventures of Byline. Byline (or "I") is the same species of creature as the Kindly Editor or the Good Doctor, who appear from time to time in these pages. That is, she is a form of shorthand. When Byline rewrites story X, that doesn't mean that I?the real, historical personage?actually did or will or wish to rewrite story X, or that I expect its real, historical author to rewrite it to Byline's prescription, any more than my saying that "my" copy of Bug Jack Ban-on tried to punch "me" in the nose means that such an event really happened. Pauline Kael's Movie Loon is another such fiction; these little creatures we send scurrying about the page are not our real, live selves, and their exploits are dictated more by the exigencies of our form than by a desire for personal glory.
