He didn't have to write the poem, only propose it. When the ship finally did show up, it was no longer a NASA ship. It was sponsored by the fledgling International Space Agency. Its crew came from all over Earth. Its drive was new, too, and a lot better than the old one. As usual, war had given research a kick in the pants. Its mission was to take up the Martian exploration where the first expedition had left off and, incidentally, to recover the remains of the twenty Americans for return to Earth. 94. "Pretty slim. Mostly the air problem. The people I've read about never sank so low that they had to." Generally, whenever people ask me to." When he reached the apron of the second stage, he strode across it and began ascending the second series of steps. We kept right on his heels. It was at this point that I noticed he was mumbling something under his breath. I listened hard, but I couldn't make out what it was. get that data into the computer pronto. He circled the clearing, never once making a sound. He approached the cottage from the side, and Hinda's singing led him on. When he reached the window, he peered in. "I don't know. It's just a feeling-that's all." Call him Smith. He was the president of a company that bore his name and which held more than a hundred patents in the scientific instrument field. He was sixty, a widower. His only daughter and her husband had been killed in a plane crash in 1978. He had a partner who handled the business operations now; Smith spent most of his time in his own lab. In the spring of 1990 he was working on an image-intensification device that was puzzling because it was too good. He had it on his bench now, aimed at a deep shadow box across the room; at the back of the box was a card ruled with black, green, red and blue lines. The only source of illumination was a single ten-watt bulb hung behind the shadow box; the light reflected from the card did not even register on his meter, and yet the image in the screen of his device was sharp and bright. When he varied the inputs to the components in a certain way, the bright image vanished and was replaced by shadows, like the ghost of another image. He had monitored every television channel, had shielded the device against radio frequencies, and the ghosts remained. Increasing the illumination did not make them clearer. They were vaguely rectilinear shapes without any coherent pattern. Occasionally a moving blur traveled slowly across them. probability had broken down completely. Yet I could swear Detweiler wasn't putting on an act. His. It took Smith six weeks to increase the efficiency of the image in-tensifier enough to bring up the ghost pictures clearly. When he succeeded, the image on the screen was instantly recognizable. It was a view of Jack McCranie's office; the picture was still dim, but sharp enough that Smith could see the expression on Jack's face. He was leaning back in his chair, hands behind his head. Beside him stood. The grey man looked after Amos until he disappeared. Then he put his hand on his head, which was altered? a different gene in each individual perhaps. The science of genetics would then advance in. nate from fiction these idiosyncratic qualities other readers find valuable, art being of an order of complexity nearer to that of human beings (high) than that of facial tissues (low).
